

Point-by-point response

A registered genome-wide analysis identifies robust, context-dependent transcriptional responses of lychee to *Peronophythora litchii*

Manuscript ID: e2b3b681-cd18-4494-8927-bb3094d0bf9e v1.0

Eric Zhuang | September 17, 2026

Dear Editorial Support Team,

Thank you for the technical check. The revised manuscript addresses each comment as detailed below.

Point 1

Comment: Please provide a Clinical Trial Number in the manuscript. If not applicable, please state the following in the manuscript: "Clinical trial number: not applicable."

Response: Not applicable. The manuscript now includes a new Declarations subsection titled **Clinical trial number** with the exact statement: "**Clinical trial number: not applicable.**"

Point 2

Comment: If your study is a clinical trial, please provide the necessary registration details (registry, trial registration number, and date of registration). If not applicable, please state the following in the manuscript: "Clinical trial number: not applicable."

Response: Not applicable. This study reanalyzes public plant sequencing data and is not a clinical trial. The revised manuscript states: "**Clinical trial number: not applicable.**"

Point 3

Comment: Table caption(s) missing for Table S1 in the manuscript. Include a brief title or description next to each table.

Response: Added "**Table S1. Biological-unit registry.**" under **Supplementary information - Supplementary table captions**. That list now covers all machine-readable Tables S1-S18. Their files are available exclusively in the version-specific Zenodo record: <https://zenodo.org/records/22436625>.

Point 4

Comment: Table caption(s) missing for Table S18 in the manuscript. Include a brief title or description next to each table.

Response: Added "**Table S18. Power-simulation minimum detectable effects.**" under **Supplementary information - Supplementary table captions**. The complete caption list covers Tables S1-S18; their files are archived in the cited Zenodo record.

We appreciate the opportunity to correct these items and respectfully submit the revised manuscript for further assessment.

Sincerely,
Eric Zhuang
